

## **Client Requirements**

### **Mission Statement**

We believe the ability to access resources is the first step towards success.

Through our simple and contactless platform, we enable doers to get what they need to get stuff done.

Introducing Reserved, a safer and more efficient mean to complete peer-to-peer transactions.

### **Users:**

- Individual Users (Acting as buyer and/or seller)

### **Key Features:**

- Box does facial recognition to verify correct user is using functions (buying/selling)
- Box does RFID verification to verify correct user is using functions (buying/selling)

### **MVP Functions:**

#### **Software )**

- (1) A user can create an account
- (2) A user can see boxes pending pickup
- (3) A user can reserve a box and set a transaction price.
- (4) A user can unlock a box and pay the transaction price

#### **Hardware )**

- (1) A user can use the camera (with facial recognition) to unlock the box
- (2) A user can use RFID to unlock the box.
